

Click on Generation and Click on Model Training-

The model training screen should open up

Now keep a reading material of about 2-3 mins handy .  
Click Start Recording

Read out the script

Once done click on Stop Recording

You can now play the audio and check if recording came out fine.

Once done you can click on upload. Upload takes a few seconds to start and so be patient and DON'T CLICK ON UPLOAD AGAIN and AGAIN.

You should get a confirmation message that your upload is done.

Once upload is done your training job is triggered.

You can click on Job Tracking and see status of your job. Job will initially be Queue and then in started status. For training Model you should check on Train Jobs status only.

Model training is a compute intensive job and takes 15 mins to complete. So be patient. Grab a coffee and come back and check status.

Now the Song conversion page should open up

Generation ▾Recharge ▾Credits ▾Samples

### Upload File and Select Speaker

File: (only mp3 format)

Choose FileNo file chosen

Speaker:

hanks

Upload File

[Go to Job Tracking Page](#)

You should see your model in front of speaker (as hanks is shown here)

Choose an mp3 file for conversion. Maximum duration of file is 6 mins audio. Make sure it's a solo song for best performance.

After that click Upload File. Wait for upload to finish (DON'T CLICK Upload Multiple times)

You can click on job tracking link below the Upload Files button to check status of your conversion job. It should take 10 mins to convert depending on current load on the system.
